

METRI-VERT

(c) 1979 Steven W. Pederson and Sherwin A. Steffin

As today's society begins the transition to the Metric system, METRI-VERT allows anyone to be fluent in both the English and Metric Systems. Conversions are available for length/distance, area, volume, weight, and temperature. Also provided is a Display Page which stores up to 20 calculations for easy reading.

For Apple II and II-plus computers
Requires 32K Applesoft

***** IMPORTANT NOTICE: *****Addendum on Diskette and DOS Formats

Apple is currently in the process of transition between version 3.2.1 and 3.3 of its Disk Operating System (DOS). The principal difference between the two is that the old (3.2.1) DOS used a 13-sector format, whereas the new (3.3) one uses a 16-sector format.

As of this date, all Edu-Ware products for the Apple II (including this one) may be run in either format.

In order to guarantee this compatibility, the diskette accompanying this package operates in a 13-sector format. If your system is designed for this format (DOS 3.2.1 and earlier), then you need not read this notice as this documentation applies directly.

If your system runs in a 16-sector format, (DOS 3.3 or later) you must enable your system to read 13-sector diskettes before you may boot the EDU-WARE program diskette. Apple has provided two ways in which to do this. The easiest is use the diskette that came with your disk drives or your update kit entitled "DOS 3.3 BASICS" (described on page 182 of Apple II, The DOS Manual). You must be sure that your disk controller is located in slot #6. (Remember to turn the power off if you are switching to slot #6!) Then, boot the "BASICS" diskette. After a few seconds, the screen will say:

INSERT YOUR 13-SECTOR DISKETTE
AND PRESS RETURN

Now you can boot your Edu-Ware program diskette; it will behave exactly as described in this documentation. (But you will have to repeat the process if you want to re-boot the system.)

Alternately, (or if you want your disk controller in a slot other than #6) you may boot to the "DOS 3.3 SYSTEM MASTER" diskette, type in:

BRUN BOOT 13

and then boot your Edu-Ware diskette.

Either way, the process consists of:

1. Use the "BASICS" diskette or the "BOOT 13" program to enable your system to boot 13-sector diskettes.
2. Boot your Edu-Ware program diskette as described in this documentation.

Edu-Ware does not recommend the updating of its products using the program "MUFFIN", although attempting to upgrade poses no real risk to the user. The Edu-Ware Warranty applies only to your original, serialized, Edu-Ware produced, (13-sector) program diskette.

***** IMPORTANT NOTICE *****

Attention on Diskette and DOS Format

Apple II computer is the standard of comparison between versions 1.0 and 2.0 of the Disk Operating System (DOS). The principal difference between the two is that the old 1.0 DOS uses a 16-sector format whereas the new 2.0 DOS uses a 32-sector format.

As of this date, all software products for Apple II (including this one) may be run in either format.

In order to enhance this compatibility, the diskette was formatted in a manner compatible with a 16-sector format. If your system is capable of running in a 32-sector format, you may wish to format the diskette in that format. (See page 10 of the Disk II User's Manual.) You may also wish to format the diskette in a 16-sector format. (See page 10 of the Disk II User's Manual.)

If your system runs in a 16-sector format, you may wish to format your system to run in a 32-sector format. Apple has provided two ways in which to do this. The easiest is to use the Disk II User's Manual which is included with your disk drive. The second is to use the Disk II User's Manual which is included with your disk drive. (See page 10 of the Disk II User's Manual.) You may also wish to format the diskette in a 16-sector format. (See page 10 of the Disk II User's Manual.)

Thank you for your interest in this product. We will be happy to answer any questions you may have. Please contact us at the address below. (See page 10 of the Disk II User's Manual.)

Apple II, for its part, will continue to be a first-class product. You may wish to format the diskette in a 16-sector format. (See page 10 of the Disk II User's Manual.)

and then boot your low-level diskette. The program consists of a "BOOT" program to be used with the "BASIC" program or the "BASIC" program to be used with the "BASIC" program.

2. If your low-level diskette is formatted in a 16-sector format, you may wish to format the diskette in a 32-sector format. (See page 10 of the Disk II User's Manual.)

The diskette does not contain any programs or data. It is a blank diskette. You may wish to format the diskette in a 16-sector format. (See page 10 of the Disk II User's Manual.)

METRI-VERT

DESCRIPTION:

METRI-VERT lets anyone become fluent in transitions between the Metric and English systems of measurement. Conversions are available for length/distances, areas, volumes, weights and temperatures. The user is also provided with a Display Page which stores up to 20 calculations. Accuracy is to a minimum of three significant digits.

USE:

Disk:

Boot the system and type: RUN METRI-VERT

Cassette with ROM Applesoft:

LOAD and RUN

Cassette with RAM Applesoft:

LOAD Applesoft. Type: RUN

Load and run METRI-VERT.

MEMORY:

METRI-VERT requires a 32K Apple (Cassette users with ROM Applesoft need only 16K.)

PROBLEMS ?

Edu-Ware is firmly committed to supporting the users of its products. This support consists of a 30-day warranty, followed by unlimited low-cost service and updates. Note that the Edu-Ware Warranty applies equally to both "glitches" (bad media problems) and "bugs" (program errors).

Regardless of the nature of your problem, we would ask you to use the form on the back of this page in addressing our Service Dept. In the event that charges are in order, please accompany your service request with a check or money order, otherwise your return shipment will be sent via U.P.S., C.O.D. Please note that in all cases, you must include your original serialized program diskette as proof of purchase. (However, we normally replace it with a fresh diskette.)

IMPORTANT NOTE:

Many program errors are the result of a defective disk drive, and not program "bugs" or "glitches". Whenever you experience software trouble, you should compare the results of the various commercial software packages you may own. If you consistently find trouble, consult your computer dealer.

EDU-WARE 30-DAY WARRANTY

Edu-Ware Services, Inc. warrants this software package to operate within all specifications contained in its accompanying documentation. Should this package fail to meet its specifications within 30 days of purchase by the end user, Edu-Ware Services, Inc. will, at its sole discretion:

1. Correct the failure, by replacement of the defective or error-laden media, upon receipt of the defective program diskette, proof of purchase date, and written description of the problem.

--OR--

2. Refund the original purchase price, upon receipt of the defective program, documentation and accompanying materials.

This warranty is null and void in cases where the user has attempted to make modifications in the program, physically damaged the program diskette, or obtained the product through an unauthorized or illegal distribution channel.

Edu-Ware Services, Inc. will assume no responsibility for the suitability of its products to the user's application. The purchaser must assume all responsibility for the suitability of the application. Edu-Ware Services, Inc. reserves the right to make improvements in its products at any time, and without notice, and to replace any defective products with improved versions.

Incidental and consequential damages caused by the malfunction, defect or otherwise, and with respect to the breach of any expressed or implied warranty are not the responsibility of Edu-Ware Services, Inc., and to the extent permitted by law, are hereby excluded both for property damage, and to the extent not unconscionable, for personal injury damage. Some states do not allow the exclusion of incidental or consequential damages, so the above may not apply to all users.
